PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate passionate about full-stack web development, digital image processing, and machine learning, with experience in academic projects and hackathons. Skilled in designing AI-driven agricultural image analysis tools and conceptualizing scalable digital health solutions. Adept at leveraging robust software architectures to solve complex real-world challenges.

EDUCATION

Sir M. Visvesvaraya College of Engineering

Completed 6th Semester

Bachelor of Engineering in Computer Science & Engineering • CGPA: 7.9 / 10.0

TECHNICAL SKILLS

Programming Languages	Java, Python, C, JavaScript (ES6+), HTML5, CSS3, SQL
AI, ML & Image Processing	Digital Image Processing, Computer Vision, OpenCV, Spectral Analysis, Model Optimization
Cloud & Web Development	Cloud Computing, Full-Stack Web Development, Interactive UI/UX Design, DOM Manipulation
Tools & Environments	VS Code, Git, GitHub, Linux, Jupyter Notebooks
Core Concepts	Data Structures & Algorithms (DSA), OOP, DBMS, System Architecture

PROJECTS

Aegis-Spectral — AI-Driven Image Processing & Spectral Analysis

Ongoing

Tech Stack: Python, OpenCV, NumPy, SciPy, Jupyter Notebooks, Git

- Engineering a non-invasive pesticide detection pipeline utilizing neuro-spectral image analysis to process produce dataset samples.
- Optimizing feature extraction and image enhancement algorithms, targeting a ~20% improvement in detection signal clarity compared to baseline RGB methods.
- Formulating non-destructive optical testing workflows tailored for rapid local agricultural quality inspection.

Mini Code Canva — Interactive Web Development Learning Platform

Tech Stack: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, VS Code, Git

- Developed an interactive, gamified learning platform featuring 15+ coding puzzles and web design quizzes to teach frontend development fundamentals.
- Built a responsive, zero-dependency browser frontend that improved user interaction efficiency and DOM rendering performance.

HACKATHONS & COMPETITIONS

Smart India Hackathon (SIH)

2025

Project: Digital Mental Health & Psychological Support System for Students in Higher Education

- Proposed a digital mental health platform tailored for students in higher education for Smart India Hackathon 2025.
- Contributed to problem analysis, solution design, user workflow, and pitch presentation for confidential support mechanisms.

CERTIFICATIONS & LEADERSHIP PROGRAMS

- She Innovates Bootcamp (2026) VTU VRIF, Belagavi:** Selected among 53 student entrepreneurs in a 6-day flagship program; applied 5W1H Problem Recognition & "5 Whys" to refine startup models.
- NPTEL Certifications:** Programming in Java & Cloud Computing Certification
- TCS iON & Center of Excellence:** Professional Certification | Certification in AI-Based Assessment
